STATEMENT OF SUBSTANCE OF INTERVIEW U.S. Appln. No. 09/917,897

Q65704

5. Brief Identification of principal arguments: the thin membranes of the pending

application can be distinguished from the disclosure of Galis et al. based on the use of a cross-

linking agent in the pending application and the non-analogous use of agarose in Galis et al.

6. Indication of other pertinent matters discussed: recitation of metals or dyes in the

claims; recitation of quantitative measurement of a protease in place of claims to a qualitative

detection.

7. Results of Interview: Applicants will consider the Examiner's suggestions.

It is believed that no petition or fee is required. However, if the USPTO deems

otherwise, Applicant hereby petitions for any extension of time which may be required to

maintain the pendency of this case, and any required fee, except for the Issue Fee, for such

extension is to be charged to Deposit Account No. 19-4880.
